1987 *Journal of Thermophysics and Heat Transfer* Index

How to Use the Index

In the Subject Index, pages 379–381, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 381, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 382–384, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Local Heat-Transfer Coefficients of Simulated Smooth Glaze Ice Formations on a Cylinder T87-017

Energy

Combustion

Interaction of Radiation with Turbulence: Application to a Combustion System T87-008

Conservation

Experimental Study of Natural Convection in a Partially Porous Enclosure T87-038
Heat and Mass Transfer in Partial Enclosures T87-037
Radiative Heat Transfer in Emitting-Absorbing-Scattering Spherical Media T87-022

Geothermal

Effect of Thermal Stratification on Free Convection within a Porous Medium T87-041

Lasers

Mechanisms for Thermally Enhanced Target Coupling by Repetitively Pulsed Lasers T87-028

Nuclear Fission

Melting of a Horizontal Substrate Placed Under a Heavier and Miscible Pool T87-048

Nuclear Fusion

Melting of a Horizontal Substrate Placed Under a Heavier and Miscible Pool T87-048

Rotating Machinery

Local Endwall Heat/Mass Transfer Distributions in Pin Fin Channels T87-054
Heat Transfer in Shrouded Rectangular Cavities T87-036
Local Heat-Transfer Performance and Mechanisms in Radial Flow Between Parallel Disks T87-016

Fluid Dynamics

Boundary Layers and Convective Heat Transfer-Laminar

Thermal Boundary Layer on a Continuous Moving Plate with Freezing T87-050
Effect of Thermal Stratification on Free Convection within a Porous Medium T87-041
Mixed Convection From Vertical and Inclined Moving Sheets in a Parallel Freestream T87-040
Transition to Oscillatory Convective Heat Transfer in a Fluid-Saturated Porous Medium T87-039
Experimental Study of Natural Convection in a Partially Porous Enclosure T87-038
Comparison of Wet and Dry Growth in Artificial and Flight Icing Conditions T87-031
Heat Transfer in Squish Gaps T87-030
Interaction of Surface-Tension and Buoyancy Mechanisms in Horizontal Liquid Layers T87-019
Local Heat-Transfer Coefficients of Simulated Smooth Glaze Ice Formations on a Cylinder T87-017
Local Heat-Transfer Performance and Mechanisms in Radial Flow Between Parallel Disks T87-016

Boundary Layers and Convective Heat Transfer-Turbulent

Heat Transfer and Pressure Drop Experiments in Air-Cooled Electronic-Component Arrays T87-055
Heat Transfer in Shrouded Rectangular Cavities T87-036
Local Heat-Transfer Performance and Mechanisms in Radial Flow Between Parallel Disks T87-016

Computational Methods

Heat Transfer in Shrouded Rectangular Cavities T87-036
Computational Simulation of Laser Heat Processing of Materials T87-025

Multiphase Flows

Transient, Stratified, Enclosed Gas and Liquid Behavior with Concentrated Heating from Above T87-053
Heat and Mass Transfer in Partial Enclosures T87-037
Two-Dimensional Condensing Vapor Flow on Parallel Flat Plates in an Enclosure T87-018
The Circulating Balls Heat Exchanger (CIBEX) T87-015

Plasmadynamics and MHD

Mechanisms for Thermally Enhanced Target Coupling by Repetitively Pulsed Lasers T87-028

Radiatively Coupled Flows and Heat Transfer

Gas Particle Radiator T87-042
A Two-Particle Model for Rocket Plume Radiation T87-002

Shock Waves and Detonations

Hypersonic Merged-Layer Flow on a Sphere T87-003

Supersonic and Hypersonic Flow

Direct Simulation of Hypersonic Flows Over Blunt Wedges T87-014

Viscous Nonboundary-Layer Flows

Heat Transfer and Pressure Drop Experiments in Air-Cooled Electronic-Component Arrays T87-055
Interaction of Surface-Tension and Buoyancy Mechanisms in Horizontal Liquid Layers T87-019

Interdisciplinary Topics

Analytical and Numerical Methods

Thermal Boundary Layer on a Continuous Moving Plate with Freezing T87-050
Mixed Convection From Vertical and Inclined Moving Sheets in a Parallel Freestream T87-040
Transition to Oscillatory Convective Heat Transfer in a Fluid-Saturated Porous Medium T87-039
Computation of Heat Transfer with Solid/Liquid Phase Change Including Free Convection T87-020

Atmospheric and Space Sciences

Comparison of Wet and Dry Growth in Artificial and Flight Icing Conditions T87-031

Lasers and Laser Applications

Transmission of a Laser Beam Through Anisotropic Scattering Media T87-034
Computational Simulation of Laser Heat Processing of Materials T87-025

Numerical Analysis

Determination of the Cross-Sectional Temperature Distribution and Boiling Limitation of a Heat Pipe T87-027

Space Processing

Interaction of Surface-Tension and Buoyancy Mechanisms in Horizontal Liquid Layers T87-019
Design of a Thermocapillary Flow Experiment in Reduced Gravity T87-012

Propulsion

Combustion and Combustor Designs

Heat Transfer in Squish Gaps T87-030

Spacecraft Technology

Temperature Control

Variable Conductance Heat Pipes: A First-Order Model T87-005

Testing, Flight and Ground

A Two-Particle Model for Rocket Plume Radiation T87-002

Structural Mechanics and Materials

Materials, Properties of

Thermomechanical Effects of Intense Thermal Heating on Materials/Structures T87-024

Thermal Stresses

Periodic Heat Conduction Through Composite Panels T87-026

Thermophysics and Thermochemistry

Ablation, Pyrolysis, Thermal Decomposition and Degradation (including Refractories)

Steady State Ablation of an Arrhenius Material by External Heating T87-049
Structural Response of Materials Due to In-Depth Heating T87-029
Thermomechanical Effects of Intense Thermal Heating on Materials/Structures T87-024
Generalized Phase Change Model for Melting and Solidification with Internal Heat Generation T87-023

Experimental Methods of Diagnostics

Transmission of a Laser Beam Through Anisotropic Scattering Media T87-034
Comparison of Wet and Dry Growth in Artificial and Flight Icing Conditions T87-031
Two-Dimensional Condensing Vapor Flow on Parallel Flat Plates in an Enclosure T87-018

Heat Conduction

Conjugated Heat Transfer from a Strip Heater Using the Unsteady Surface Element Method T87-052
Heat Transfer by Combined Conduction and Radiation in Axisymmetric Enclosures T87-045
Effect of Thermal Stratification on Free Convection within a Porous Medium T87-041
Periodic Heat Conduction Through Composite Panels T87-026
Computational Simulation of Laser Heat Processing of Materials T87-025
Simultaneous Conduction and Radiation in a Two-Layer Planar Medium T87-021

Heat Pipes

Effective Thermal Conductivity of Sintered Heat Pipe Wicks T87-051
Transient Heat Pipe Response and Rewetting Behavior T87-032
Two-Dimensional Condensing Vapor Flow on Parallel Flat Plates in an Enclosure T87-018
Variable Conductance Heat Pipes: A First-Order Model T87-005

Radiation and Radiative Heat Transfer

Crystallographic Effects During Radiative Melting of Semitransparent Materials T87-047
Solar Energy Transfer Through Semi-Transparent Plate Systems T87-046
Heat Transfer by Combined Conduction and Radiation in Axisymmetric Enclosures T87-045
Successive Improvement of the Modified Differential Approximation in Radiative Heat Transfer T87-044
Radiative Transfer in Thermal Insulations of Hollow and Coated Fibers T87-043
Gas Particle Radiator T87-042
Evaluation of a Method for Measuring Spectral Emissivity at Moderate Temperatures T87-035
Transmission of a Laser Beam Through Anisotropic Scattering Media T87-034
Radiative Cooling of a Layer with Nonuniform Velocity: A Separable Solution T87-033
Generalized Phase Change Model for Melting and Solidification with Internal Heat Generation T87-023
Radiative Heat Transfer in Emitting-Absorbing-Scattering Spherical Media T87-022
Simultaneous Conduction and Radiation in a Two-Layer Planar Medium T87-021
Effect of Multiple Scattering on Radiation Transmission in Absorbing-Scattering Media T87-011
Radiation Transfer in Isotropically Scattering, Rectangular Enclosures T87-010
Independent and Dependent Scattering in Packed-Sphere Systems T87-009
Interaction of Radiation with Turbulence: Application to a Combustion System T87-008
Radiative and Conductive Transfer for a Gas/Soot Mixture Between Diffuse Parallel Plates T87-007
Heat Transfer Analysis of Fiberglass Insulations With and Without Foil Radient Barriers T87-006
A Two-Particle Model for Rocket Plume Radiation T87-002

Radiatively Coupled Flows and Heat Transfer

Crystallographic Effects During Radiative Melting of Semitransparent Materials T87-047
Mechanisms for Thermally Enhanced Target Coupling by Repetitively Pulsed Lasers T87-028
Effect of Multiple Scattering on Radiation Transmission in Absorbing-Scattering Media T87-011
Interaction of Radiation with Turbulence: Application to a Combustion System T87-008
Radiative and Conductive Transfer for a Gas/Soot Mixture Between Diffuse Parallel Plates T87-007
Hypersonic Merged-Layer Flow on a Sphere T87-003
A Review of Some Approximate Methods Used in Aerodynamic Heating Analyses T87-001

Thermal Control

Heat Transfer and Pressure Drop Experiments in Air-Cooled Electronic-Component Arrays T87-055
Solar Energy Transfer Through Semi-Transparent Plate Systems T87-046
Transient Heat Pipe Response and Rewetting Behavior T87-032
Determination of the Cross-Sectional Temperature Distribution and Boiling Limitation of a Heat Pipe T87-027
Variable Conductance Heat Pipes: A First-Order Model T87-005
Vapor-Deposited Emittance-Catalysis Coatings for Superalloys in Heat-Shield Application T87-004

Thermal Modeling and Analysis

Transient, Stratified, Enclosed Gas and Liquid Behavior with Concentrated Heating from Above T87-053
Conjugated Heat Transfer from a Strip Heater Using the Unsteady Surface Element Method T87-052
Effective Thermal Conductivity of Sintered Heat Pipe Wicks T87-051
Melting of a Horizontal Substrate Placed Under a Heavier and Miscible Pool T87-048
Solar Energy Transfer Through Semi-Transparent Plate Systems T87-046
Transition to Oscillatory Convective Heat Transfer in a Fluid-Saturated Porous Medium T87-039
Experimental Study of Natural Convection in a Partially Porous Enclosure T87-038
Heat and Mass Transfer in Partial Enclosures T87-037
Transient Heat Pipe Response and Rewetting Behavior T87-032
Structural Response of Materials Due to In-Depth Heating T87-029
Determination of the Cross-Sectional Temperature Distribution and Boiling Limitation of a Heat Pipe T87-027
Periodic Heat Conduction Through Composite Panels T87-026
Thermomechanical Effects of Intense Thermal Heating on Materials/Structures T87-024
Radiative Heat Transfer in Emitting-Absorbing-Scattering Spherical Media T87-022
Computation of Heat Transfer with Solid/Liquid Phase Change Including Free Convection T87-020
Local Heat-Transfer Coefficients of Simulated Smooth Glaze Ice Formations on a Cylinder T87-017
The Circulating Balls Heat Exchanger

(CIBEX) T87-015
Independent and Dependent Scattering in Packed-Sphere Systems T87-009

Thermal Surface Properties

Evaluation of a Method for Measuring Spectral Emissivity at Moderate Temperatures T87-035
Numerical Analysis of Solidification in a Thick-Walled Cylindrical Container T87-013

Thermophysical Properties of Matter

Effective Thermal Conductivity of Sintered Heat Pipe Wicks T87-051

Evaluation of a Method for Measuring Spectral Emissivity at Moderate Temperatures T87-035
Independent and Dependent Scattering in Packed-Sphere Systems T87-009

Chronological Index

T87-001 A Review of Some Approximate Methods Used in Aerodynamic Heating Analyses. Fred R. DeJarnette, *North Carolina State University*; H. Harris Hamilton and K. James Weilmuenster, *NASA Langley Research Center*; and F. McNeil Cheatwood, *North Carolina State University* (1, 1, p. 5) Article based on AIAA Paper 85-0906

T87-002 A Two-Particle Model for Rocket Plume Radiation. D. K. Edwards, Y. Sakurai and D. S. Babikian, *University of California* (1, 1, p. 13) Article based on AIAA Paper 85-1069

T87-003 Hypersonic Merged-Layer Flow on a Sphere. A. C. Jain, *NASA Langley Research Center* (1, 1, p. 21) Article based on AIAA Paper 85-1031

T87-004 Vapor-Deposited Emittance-Catalysis Coatings for Superalloys in Heat-Shield Application. Ronald K. Clark, *NASA Langley Research*; George R. Cunnington Jr. and John C. Robinson, *Lockheed Palo Alto Research Laboratory* (1, 1, p. 28) Article based on AIAA Paper 85-403

T87-005 Variable Conductance Heat Pipes: A First-Order Model. R. P. Bobco, *Hughs Aircraft Company* (1, 1, p. 35) Article based on AIAA Paper 85-0935

T87-006 Heat Transfer Analysis of Fiberglass Insulations With and Without Foil Radient Barriers. J. W. Rish III and J. A. Roux, *University of Mississippi* (1, 1, p. 43) Article based on AIAA Paper 86-1294

T87-007 Radiative and Conductive Transfer for a Gas/Soot Mixture Between Diffuse Parallel Plates. Theodore F. Smith, Abdullah M. Al-Turki, Ki-Hong Byun and Tai K. Kim, *University of Iowa* (1, 1, p. 50) Article based on AIAA Paper 85-1070

T87-008 Interaction of Radiation with Turbulence: Application to a Combustion System. T. H. Song and R. Viskanta, *Purdue University* (1, 1, p. 56) Article

T87-009 Independent and Dependent Scattering in Packed-Sphere Systems. B. L. Drolen and C. L. Tien, *University of California* (1, 1, p. 63) Article

T87-010 Radiation Transfer in Isotropically Scattering, Rectangular Enclosures. S. T. Thynell and M. N. Ozisik, *North Carolina State University* (1, 1, p. 69) Article

T87-011 Effect of Multiple Scattering on Radiation Transmission in Absorbing-Scattering Media. W. W. Yuen and W. Dunaway, *University of California* (1, 1, p. 77) Article based on AIAA Paper 85-0947

T87-012 Design of a Thermocapillary Flow Experiment in Reduced Gravity. Y. Kamotani and S. Ostrach, *Case Western Reserve University* (1, 1, p. 83) Article based on AIAA Paper 86-0200

T87-013 Numerical Analysis of Solidification in a Thick-Walled Cylindrical Container. Richard N. Smith, Richard L. Pike and Carol M. Bergs, *Rensselaer Polytechnic Institute* (1, 1, p. 90) Article based on AIAA Paper 85-1044

T87-014 Direct Simulation of Hypersonic Flows Over Blunt Wedges. Vincent Jr. Cuda, *Old Dominion University Research Foundation*; and James N. Moss, *NASA Langley Research Center* (1, 2, p. 97) Article based on AIAA Paper 86-1348

T87-015 The Circulating Balls Heat Exchanger (CIBEX). **T87-016 Local Heat-Transfer Performance and Mechanisms in Radial Flow Between Parallel Disks.** S. Mochizuki, *Tokyo University of Agriculture and Technology*; and Wen-Jei Yang, *University of Michigan* (1, 2, p. 112) Article

T87-017 Local Heat-Transfer Coefficients of Simulated Smooth Glaze Ice Formations on a Cylinder. Martin Pais and S. N. Singh, *University of Kentucky* (1, 2, p. 117) Article

T87-018 Two-Dimensional Condensing Vapor Flow on Parallel Flat Plates in an Enclosure. Yasunori Kobayashi and Tsuyoshi Matsumoto, *University of Tsukuba, Japan* (1, 2, p. 122) Article based on AIAA Paper 85-1046

T87-019 Interaction of Surface-Tension and Buoyancy Mechanisms in Horizontal Liquid Layers. G. S. R. Sarma, *Deutsche Forschungs-und Versuchsanstalt fur Luft und Raumfahrt e. V.* (1, 2, p. 129) Article based on AIAA Paper 85-0986

T87-020 Computation of Heat Transfer with Solid/Liquid Phase Change Including Free Convection. G. E. Schneider, *University of Waterloo, Canada* (1, 2, p. 136) Article based on AIAA Paper 85-0404

T87-021 Simultaneous Conduction and Radiation in a Two-Layer Planar Medium. C. -H. Ho and M. N. Ozisik, *North Carolina State University* (1, 2, p. 154) Article

T87-022 Radiative Heat Transfer in Emitting-Absorbing-Scattering Spherical Media. Timothy W. Tong and Pananjady S. Swathi, *University of Kentucky* (1, 2, p. 162) Article

T87-023 Generalized Phase Change Model for Melting and Solidification with Internal Heat Generation. S. H. Chan and K. Y. Hsu, *University of Wisconsin* (1, 2, p. 171) Article

T87-024 Thermomechanical Effects of Intense Thermal Heating on Materials/Structures. C. I. Chang, C. A. Griffis, F. R. Stonesifer and J. A. Nemes, *U. S. Naval Research Laboratory* (1, 2, p. 175) Article

T87-025 Computational Simulation of Laser Heat Processing of Materials. Vijaya Shankar and Daniel Gnanamuthu, *Rockwell International Science Center* (1, 2, p. 182) Technical Note

T87-026 Periodic Heat Conduction Through Composite Panels. Lit S. Han, *Ohio State University* (1, 2, p. 184) Technical Note

T87-027 Determination of the Cross-Sectional Temperature Distribution and Boiling Limitation of a Heat Pipe. G. P. Peterson, *Texas A & M University* (1, 2, p. 189) Technical Note

T87-028 Mechanisms for Thermally Enhanced Target Coupling by Repetitively Pulsed Lasers. E. J. Jumper, *U. S. Air Force Institute of Technology*; J. P. Jackson, *KAMAN Sciences Corporation*; J. R. Couick and L. L. McKee, *U. S. Air Force Institute of Technology*; C. L. Bohn and M. L. Crawford, *U. S. Air Force Academy* (1, 3, p. 193) Article based on AIAA Paper 86-1075

T87-029 Structural Response of Materials Due to In-Depth Heating. J. A. Nemes and C. I. Chang, *U. S. Naval Research Laboratory* (1, 3, p. 201) Article

T87-030 Heat Transfer in Squish Gaps. J. H. Spurk, *Technische Hochschule Darmstadt, Federal Republic of Germany* (1, 3, p. 209) Article based on AIAA Paper 86-1331

T87-031 Comparison of Wet and Dry Growth in Artificial and

Flight Icing Conditions. R. John Hansman Jr. and Mark S. Kirby, *Massachusetts Institute of Technology* (1, 3, p. 215) Article based on AIAA Paper 86-1352

T87-032 Transient Heat Pipe Response and Rewetting Behavior. J. H. Ambrose and L. C. Chow, *University of Kentucky*; and J. E. Beam, *U. S. Air Force Aero Propulsion Laboratory* (1, 3, p. 222) Article

T87-033 Radiative Cooling of a Layer with Nonuniform Velocity: A Separable Solution. Robert Siegel, *NASA Lewis Research Center* (1, 3, p. 228) Article

T87-034 Transmission of a Laser Beam Through Anisotropic Scattering Media. H. F. Nelson and B. V. Satish, *University of Missouri-Rolla* (1, 3, p. 233) Article

T87-035 Evaluation of a Method for Measuring Spectral Emissivity at Moderate Temperatures. S. J. Olstad, F. Tanaka and D. P. Dewitt, *Purdue University* (1, 3, p. 240) Article based on AIAA Paper 85-0991

T87-036 Heat Transfer in Shrouded Rectangular Cavities. M. K. Chyu, D. E. Metzger and C. L. Hwan, *Arizona State University* (1, 3, p. 247) Article

T87-037 Heat and Mass Transfer in Partial Enclosures. K. Vafai and S. Sarkar, *Ohio State University* (1, 3, p. 253) Article

T87-038 Experimental Study of Natural Convection in a Partially Porous Enclosure. S. B. Sathe and T. W. Tong, *Arizona State University*; and M. A. Faruque, *Intel Corporation* (1, 3, p. 260) Article

T87-039 Transition to Oscillatory Convective Heat Transfer in a Fluid-Saturated Porous Medium. Cyrus K. Aidun and Paul H. Steen, *Cornell University* (1, 3, p. 268) Article based on AIAA Paper 86-1264

T87-040 Mixed Convection From Vertical and Inclined Moving Sheets in a Parallel Freestream. N. Ramachandran, T. S. Chen and B. F. Armaly, *University of Missouri-Rolla* (1, 3, p. 274) Article

T87-041 Effect of Thermal Stratification on Free Convection within a Porous Medium. Akira Nakayama and Hitoshi Koyama, *Shizuoka University, Japan* (1, 3, p. 282) Technical Note

T87-042 Gas Particle Radiator. Donald L. Chubb, *NASA Lewis Research Center* (1, 3, p. 285) Technical Note

T87-043 Radiative Transfer in Thermal Insulations of Hollow and Coated Fibers. K. Y. Wang, Sunil Kumar and C. L. Tien, *University of California* (1, 4, p. 289) Article

T87-044 Successive Improvement of the Modified Differential Approximation in Radiative Heat Transfer. C. Y. Wu, *National Cheng Kung University, Taiwan*; W. H. Sutton and T. J. Love, *University of Oklahoma* (1, 4, p. 296) Article

T87-045 Heat Transfer by Combined Conduction and Radiation in Axisymmetric Enclosures. Adnan Yucel and Mark L. Williams, *Louisiana State University* (1, 4, p. 301) Article based on AIAA Paper 86-1289

T87-046 Solar Energy Transfer Through Semi-Transparent Plate Systems. Steven J. Mitts and Theodore F. Smith, *University of Iowa* (1, 4, p. 307) Article based on AIAA Paper 86-1293

T87-047 Crystallographic Effects During Radiative Melting of Semitransparent Materials. B. W. Webb and R. Viskanta, *Purdue University* (1, 4, p. 313) Article

T87-048 Melting of a Horizontal Substrate Placed Under a Heavier and Miscible Pool. K. Taghavi, *University of Kentucky* (1, 4, p. 321) Article

T87-049 Steady State Ablation of an Arrhenius Material by External Heating. W. Borsch-Supan and L. W. Hunter, *Johns Hopkins University* (1, 4, p. 327) Article

T87-050 Thermal Boundary Layer on a Continuous Moving Plate with Freezing. F. -B. Cheung, *Pennsylvania State University* (1, 4, p. 335) Article

T87-051 Effective Thermal Conductivity of Sintered Heat Pipe Wicks. G. P. Peterson and L. S. Fletcher, *Texas A & M University* (1, 4, p. 343) Article

T87-052 Conjugated Heat Transfer from a Strip Heater Using the Unsteady Surface Element Method. K. D. Cole and J. V. Beck, *Michigan State University* (1, 4, p. 348) Article based on AIAA Paper 86-1242

T87-053 Transient, Stratified, Enclosed Gas and Liquid Behavior with Concentrated Heating from Above. B. Abramzon, D. K. Edwards and W. A. Sirignano, *University of California* (1, 4, p. 355) Article

T87-054 Local Endwall Heat/Mass Transfer Distributions in Pin Fin Channels. S. C. Lau, Y. S. Kim and J. C. Hau, *Texas A & M University* (1, 4, p. 365) Article

T87-055 Heat Transfer and Pressure Drop Experiments in Air-Cooled Electronic-Component Arrays. P. R. Souza Mendes, *Pontificia Universidade Catolica do Rio de Janeiro, Brazil*; and W. F. N. Santos, *Instituto de Pesquisas Espaciais, Brazil* (1, 4, p. 373) Article based on AIAA Paper 86-1301
